

2D ANIMATED, LIVE-ACTION, PUPPETRY SERIES
78 X 7 MINS

NOW YOU KNOW

Each 7-minute adventure finds Howie and Baboo — a curious, imaginative five year-old boy and his hilarious, non-verbal little monkey sidekick — in the midst of an exciting make-believe scenario linked to the question of the episode. A Star Trek-like adventure would see them pass by the moon and later wonder why the moon has “holes” in it.

A team of real-life kid Questioners appear on the Q-Pad to offer possible (sometimes funny) answers to the question. Then Howie and Baboo go out into the real world — for example to see an astrophysicist at one of North America’s largest telescopes — and learn from a grown-up Expert who demonstrates an experiment with Howie and Baboo’s help.

Now You Know’s curriculum includes; learning through imaginative play, simple experiments and demonstrations, creative problem solving, exploring new activities and environments, cooperation, teamwork and much more!
